- CI/CD, Fastlane, Bitrise
- Mobile UI/UX design principles
- Scrum, Agile
- Restful APIs, JSON

EXPERIENCE

Senior iOS Developer @ Monstarlab

Nov 2021 – Present

Core developer for the [Top 1 E-Mail provider](#) in Germany working on MAIL.COM, GMX and WEB.DE which have at least 40 million MAU.

- Enhanced advertisement module by decreasing failure rate by 20%
- Reduced the amount of legacy dependencies which resulted in faster compile time
- Integrated IoT devices, user bracelets and [museum exhibits](#) into the app with Bluetooth and Network
- Implemented navigation system interface with game-like experience using SwiftUI

Senior iOS Developer @ Brander

Jan 2021 – Dec 2021

Lead the development for WOG [Ukraine's largest single-brand network of gas stations](#).

- Implemented the most important feature of the app to handle critical fuel shortage on the gas stations, which resulted in more efficient fuel delivery during the war
- Increased [keyboard](#) opening time & reduce RAM usage on start by 60%
- Profiled application lifecycle using Xcode instruments to find ram-usage issues and came up with a solution that decreased ram usage by 30%

iOS Developer @ Whee

Jul 2019 – Mar 2021

Worked with the Yahoo Mail team members to build [private and secure space for families](#) in Silicon Valley. Faced lots of challenges and strived to create a delightful experience for app users.

- Reduced Calendar rendering time by 30%, optimised the application for low-end devices
- Introduced Test-Driven Development, that helped move algorithm written with Swift to JS
- Brought pixel-perfect UI and exceptional UX to life

Mobile App Developer @ Sispo

Apr 2017 – Jun 2019

Contributed to every level of app development working with entrepreneurs in different industries ([social media](#), [health and mental wellbeing](#), [education](#), [navigation](#)) based in the US, UK, and Germany.

- Advised on over 12 published mobile apps projects
- Worked closely with UI/UX designers to produce a pixel-perfect design
- Implemented technical solutions that reduced maintenance cost by 70%
